

linus 4

The ideal radio control for up to 4 proportional functions!

linus 4 – handy, robust, powerful!

linus 4 is a tailor-made radio control for mobile hydraulic applications with up to 4 proportional functions. This compact device is impressive with its perfect combination of functionality and design – a trademark of the linus series from HBC-radiomatic!

linus 4 offers a high-quality and extremely robust finish. 4 linear levers guarantee precise and safe radio controlling at any time. Additionally, the transmitter is a real power-package. With its strong NiMH exchange battery, linus 4 easily allows up to 16 hours of continuous operating time without a battery change.

Another advantage of linus 4 is its extreme ease of operation. With its slim dimensions and its comfortable carrying by the belt clip, the transmitter is always at hand but never in the way!

Details at a glance:

- 4 analog linear levers.
- 4 one-step push buttons or 2 toggle and/or rotary switches/buttons + 2 push buttons.
- STOP impact switch.
- Key switch (on/off).
- Frequency ranges: 400 – 475 MHz, 868 – 928 MHz.
- Rechargeable NiMH exchange battery without memory effect.
- Approx. 16 hours of continuous operating time.
- Robust plastic housing, protection class IP 65.
- Comfortable carrying by belt clip.
- Weight: approx. 1 kg (2.2 lbs.) including battery.
- Options: radiomatic® AFS, manual frequency change.
- Recommended receivers: FSE 509, FSE 727 radiobus® and FSE 737 radiobus®.

High-quality linear levers for precise operation.

linus 4 – always at hand but never in the way!

Changing the battery in a matter of seconds!
