

orbit

The handy classic for single-step applications!

Top features:

High-quality HBC buttons!

Rotary switch!

NiMH exchange battery!

STOP impact switch!

... and much more!

Quality in Control.

Highlights:

8 high-quality HBC push buttons

The orbit is equipped with 8 single-step push buttons in best HBC quality. They are perfect to operate and ensure a long lifespan, even in rough daily use in industrial applications.

Rotary switch (option)

The orbit is available with a four-step rotary switch for switching between control levels. With the 8 push buttons, up to 32 functions can be controlled.

STOP impact switch

A STOP impact switch is part of the orbit's standard equipment. It is always at hand and ensures optimal safety for the operator in case of an emergency.

NiMH exchange battery

The orbit comes with a rechargeable NiMH exchange battery. At a typical use of 1 to 2 hours daily, the battery lasts up to 7 work-days.

Handy design

The orbit offers best HBC radio technology in pocket-size. With its compact design and low weight of only 300 g (0.6 lbs.) including battery, the transmitter lies comfortably in the hand at all times.

Applications:

Machinery and small lift equipment with single-step functions.

orbit

Carrying methods:

Belt clip.

Option:
carrying bag.
